Office Action Summary	Application No. 10/523,607	Applicant(s) BERTHON-JONES ET AL.	
	Examiner BRANDON JACKSON	Art Unit 3772	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to headgear for a respiratory mask comprising a plurality of strap portions being configured such that the plurality of straps resist collapse and retain their shape in a configuration generally approximating the shape of a wearer's head. It is considered that the configuration of the straps comprises a first "special technical feature."

Group II, claim(s) 7-10, drawn to a headgear for a respiratory mask comprising one inextensible strap portion and an elongate member provided to an end portion of at least one strap configured to allow a spacing distance between the strap portion and mask to be varied. It is considered that the inextensible strap portion and the elongate member configured to allow the spacing distance between the strap portion and mask to be varied comprises a second "special technical feature."

Group III, claim(s) 11-15 and 19, drawn to a mask for use with a ventilator or a CPAP device comprising a frame, and a cushion provided to the frame, the cushion and the frame being selectively adjustable relative to one another in one or more discrete portions. It is considered that the cushion and the frame being selectively adjustable to one another in one or more discrete portions comprises a third "special technical feature."

Group IV, claim(s) 16-18, drawn to a mask for use with a ventilator or a CPAP device comprising a frame and a cushion, the frame being at least partially encapsulated within the material of the cushion comprises a fourth "special technical feature."

Group V, claim(s) 20-23, drawn to a mask assembly for use with a ventilator or a CPAP device comprising a mask, a headgear provided to the mask with at least one fastener with an adjustable setting, and a quick release mechanism to allow removal of the mask assembly from a wearer without removing any portion of the headgear from the mask or changing the setting of the fastener. It is considered that the quick release mechanism to allow removal of the mask assembly from a wearer without removing any portion of the headgear from the mask or changing the setting of the fastener comprises a fifth "special technical feature."

Art Unit: 3772

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2. For the aforementioned reasons above, they lack the same or corresponding special technical features for the following reasons.

A telephone call was made to Paul Bowen on 3/26/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
